

Icons of the Built World

5 Most Famous Bridges

According to the American Society of Civil Engineers, there are over 617,000 bridges across the United States, 42% of which are at least 50 years old and 7.5% of which are considered structurally deficient, meaning they are in “poor” condition. And this is only in the U.S!

Globally, the situation varies, but all countries have one thing in common – aging infrastructure!

Check out the five of the most iconic bridges around the world and how they may be protected and inspected with different technologies...
