

AI Engineer (Malaga)

We are looking for an engineer in Artificial Intelligence to work with us in Malaga. The perfect candidate will join our Research Team to work on cutting edge projects. Our team's mission is to proactively assess and exploit any kind of hardware, software and mathematical tools, with special focus on deep neural networks, in order to build effective solutions aligned to the company's goals.

What will you do

- Evaluate all sorts of data sources and understand what kind of high level information can be retrieved from them that is useful to the ongoing projects.
 - Design and build the necessary hardware and software solutions.
 - Self-development of skills and knowledge.
- Additionally, we will value: experience with C++, Keras, Tensorflow, TensorRT, PyTorch, Darknet, Docker, JupyterLab, AWS, Matlab, R, scientific writing, English fluency.

What do we expect

- 3+ years of experience in software development.
- Knowledge in Artificial Neural Networks, Deep Learning, Computer Vision, Mathematics, Statistics, Data Processing, Numerical Analysis and Machine Learning.
- Experience with Linux and Python.

About the #EagleTeam

Screening Eagle Technologies | Proceq | Dreamlab

We are on a mission to protect the built world with software, sensors and data. We hire talented problem-solvers with bold ambition who share our passion for inspection technology to sustain mission-critical assets and infrastructure for future generations. Our culture is creative, innovative and inclusive. We are a fast-paced, product-driven, growth company headquartered in Switzerland with our Singapore technology hub and a global mindset looking to lead a digital revolution in inspection. Want to join the #EagleTeam?
